4-		17	17	17	17	17	16	14	13	12	10	8	6	4	2	0

Handicap:

Check the rating for each player. For each pair take the mid-point between the 2 players.
On the grid follow the figure down from one rating and across from the other to confirm the start to be given in each game. The pair with the higher rating (0+ being the highest, 4- the lowest) will always start on 0.

Examples: Team A ratings 2+ & 2- Team B rating 3+ & 3-

The mid points are 2 & 3 respectively. Follow the line across from 2 and down from 3. The number indicated is 6. Each game should start with the score at 6-0 to Team B.

Team A ratings 1+ & 1 Team B rating 1- & 2-

Exact mid-points can not be found: Follow the lines across between 1+ & 1 and down between 2+ & 2 (this represents half way between 1- & 2-).

7	9
5	7

Take either set of diagonal figures and take the average of these which in this example is 7. Team B has a start of 7

Other rules:

- Games are best of 3, up to 21. NB: 1 point only at 20-20. Otherwise usual rules apply.
